GENERAL COUNSEL

February 24, 2005

Important for immediate attention

Dear Member,

This afternoon, Judge Draganwchuk in the Circuit Court for the County of Ingham granted and issued an injunction against the Michigan Department of Labor enjoining the implementation of the International Energy Code.

The injunction means that you can continue to build under the present energy code and the building department in your jurisdiction will continue to issue building permits under the existing energy code.

We will provide you with further information but let us repeat, the court has issued the injunction and you can continue to build and request building permits under the existing energy code.

Irvin H. Yackness
